LARGO.

This town may be considered the center of population on the upper San Juan. Taking in with it the ket price of 1893: little settlement on Pine river and at Bloomfield, the population is between 1000 and 1200 persons, the majority of whom are of Spanish descent. The high culture of the fields, orchards and vineyards speaks well for the progress of the community.

### CROPS.

The first trees were planted in this county ten years ago, and as an experiment seemed very doubtful. The first settlers were principally cattle men, who knew little about farming. nental divide, being part of the Pacifice water-shed. Aside from its great clamation of lands in the La Plata however, and prospered, so that the reputation of these valleys is known all over the southwest. The southern It will be seen from the foregoing towns of Colarado, ontside the San Luis valley, are almost wholly supplied from the San Juan orchards. So remunerative has fruit culture proved that in 1891 23 000 trees were planted, and in 1892 about 50,000 of land. According to a county The planting of 1893 is not yet accurately known, but will show a ratio of progress. Last year at the Albuten miles above Largo, there is a addition to the value of the water for this county took the sweedstakes prize. The peaches in some instances measured nine inches in circumference, apples thirteen to fourteen inches and weighed sixteen to nineteen ounces. Single acres of fruit land return from \$400 to \$500; and in one orchard near Farmington are three trees, of whose yield an accurate account has been kept for four years past, that show an average reurn of \$53 per tree.

> Cereals of all kinds are grown here. wheat vielding 20 to 40 bushels per acre; oats, 30 to 80 bushels; barley, 30 to 60 brehels; rye, 15 to 30 bushels; corn, 25 to 50 bushels. A ready sale is found at good prices. Current prices for 1893 were as follows: Wheat, per cwt., \$1.40; oats, \$1.50; barley, \$1.40; corn, \$1.50; bran, p-r ton, \$18 Vegetables of every variety flourish, from the hardier vacieties, such as Irish potatoes, turnips and beets, to the more tender melons, egg-

The huge beds appear, and these then of these veins on the La Plata, says necessary is to strip the outer layer, which has been exposed to the weather for ages, and the fine, glit-tering material is found, free from slate or "bone" and ready for use. Some difference of opinion exists as to the quality of this coal, but the head of the La Plata valley. On the bureau of immigration can state on the authority of its agent that it is of a good coking character. Some of it, in his presence, was covered with sand and fired on the ground and in a short time was roasted into a fine silver coke with a ring like metal. The coal in this county is usually found in a thick strata between slate and sandstone of a very fine grain.

It is said that gold and metallic iron can be found; and the best building stone, both sandstone and granite, abound. The best mining camps of Colorado and splendid mineral belts in New Mexico are contiguous. When railroads penetrate this county the neighborhood of Olio will afford splendid opportunities for large smelters.

\*Since the foregoing was published by the bu-rean of immigration the flour mill was destroyed by fire, but will be rebuilt this summer. tJunction City is just across the Animas from Farmington, but depends on Farmington mer-chants for supplies.

Among the many enterprises which

Besides the produce mentioned in the foregoing table the county produced 35,000 pounds of honey at an average price of 121 cents a pound, and 30,000 tons of alfalfs hay which averaged \$5 per ton.

### Questions Answered.

Irrigation is the best means of fer tilizing land. Every kind of deciduous fruit can

be raised here. As a fruit raising country the San ern sheep to.

Juan has no equal, Water can be put on arid land at a cost of from \$2 to \$15 per acre.

New Mexico took first prize for wheat at the World's fair, and second

The last census gives thirty acres as the average size of an irrigated farm in New Mexico.

As a health resort for persons with weak lungs San Juan county has few peers and ne superiors.

per thousand, brick \$8 per thousand. and lime 40 cents per bushel

Rough lumber here is worth \$25

ties on the lower San Jaan, and a fine quality of fire brick can be manufactured at a nominal cost.

Experts pronounce the San Joan coal as a steam producing coal far above the average, if not the very best quality in the world.

Any information relative to the county not given in the columns of THE TIMES will be cheerfully turnished upon application to the publisher.

Water rights in company ditches cost from \$2 to \$15 per sere, with an additional cost of from \$1 to \$2 annually per acre to pay for repairs. In most cases this annual assessment can be worked out.

Sheep do well in this county, Scab and other sheep diseases are unknown here. Thousands of acres of gov. ernment land are contiguous to the streams and watering places on which they can graze nearly every month in the year. Large bunches of the wechers can be fattened on alfalfa hay during the winter, and the main flocks carried over on it at a small cost, thus making sheep raising a profitable industry. The native sheep make a most excellent cross to breed the mutton producing strains of east-

A tannery is needed and would be a good investment in this county. There are over 500,000 acres of canaagria growing wild here. It yields as high per acre as ten tons wild and from thirty tous upward under cuttivation. This plant contains 331 per cent of tannic acid, the highest average of any known agent. The tannery would be furnished with a home supply of tanning matter without the cost of a cent of freight. This cana-agria is being shipped to Enrope at a cost of between \$80 and \$100 per ton, several firms there using it for the preparation of their best Fire clay is found in large quanti- grades of leather.
